

Question No: **10731**

Moved by: **Mr. Khushdil Khan Advocate MPA**

Question	Answer
<p>Will the Minister Energy & Power state that:</p> <p>(a) How the PEDO managed the generation, transmission and distribution of power?</p> <p>(b) How many grids and micro grids and power houses have been constructed by the organization and how they are managed?</p> <p>(c) Do the Provincial Government intend to construct a main grid station like the national grid station at federal level for storage of generated power from different projects? Give detail reply please.</p>	<p>(a) All the Hydel power houses which are under the administrative control of PEDO are connected to the national grid except 4.2 MW Reshun Hydel Station Chitral Which was damaged in 2015 flood and currently WAPDA is supplying electricity in that area through 33KV transmission line owned by PEDO. Furthermore PEDO operate to run its power houses through its own technical officers/officials deputed at different station in collaboration with the O&M contractor mobilized at site.</p> <p>(b) PEDO has not constructed any Mini micro Grids. However, 277 Mini Micro Hydel Plants are constructed and are supplying Power to local community directly through local transmission and distribution system and is managed by the community itself.</p> <p>(c) Yes, the provincial government intends to construct 500 KV transmission line for Evacuation of Power from Chitral and adjacent areas with proposed grid stations at Chitral and Chakdara.</p>
